CONSTRUCTION

BUILDING SPACES THAT ADVANCE CARE

Trusted Builders for Health Care & Bioscience Facilities

EXPERTISE YOU CAN TRUST

WDS Construction partners with health systems and bioscience organizations nationwide to deliver facilities that support patient care, research and operational excellence. From specialized clinical spaces to advanced pharmaceutical and biotechnology environments, we understand the complex systems, strict standards, and regulatory requirements that define modern health care. Our team brings the expertise and experience to ensure every project enhances care delivery, supports staff, and enables innovation.

Health Care Delivery

Hospitals, clinics, and outpatient facilities require environments that prioritize patient safety, operational efficiency and high-quality care. WDS Construction brings deep expertise in modern medical design, life safety compliance and the coordination of complex systems. Whether upgrading an existing facility, expanding a clinic or building a new hospital, we help health systems deliver spaces that support patients, staff and innovative care models across multiple sites.

Biosciences

Pharmaceutical, biotechnology and life sciences facilities demand precision-built environments with strict adherence to cleanroom standards, specialized utilities and regulatory requirements. WDS Construction partners with organizations to deliver facilities that enable scientific advancement and operational efficiency. From laboratory build-outs to large-scale processing and manufacturing environments, we provide the technical expertise to translate complex needs into functional, compliant and high-performing facilities.

Our Services.

Licensed in 48 states and supported by a trusted network of industry-specialized partners, WDS Construction brings the expertise, resources, and precision needed to deliver complex medical and bioscience facilities successfully—every time. We don't just construct buildings; we create environments that support patient care, research, and operational excellence.

TAILORED SOLUTIONS

At WDS Construction, we understand that every health system and bioscience organization has unique needs. That's why we provide tailored solutions that align with your operational goals, technical requirements, and long-term vision. From site analysis and program planning to design collaboration and phased construction, we customize our approach to deliver facilities that enhance patient care, streamline workflows, and support innovation—on time, on budget, and to the highest standards.

Our Team, Your Trusted Partners

When lives and discoveries are on the line, you need a partner who understands the demands of medical and bioscience facilities. The WDS team brings the expertise, collaboration and commitment to help you move from vision to reality.

BRANDT BEER
Director of Medical & Project Executive

As Director of Medical, Brandt leads our team focused on delivering health care and bioscience facilities nationwide. With over a decade of experience across medical, industrial, retail, commercial and hospitality projects, he brings a broad perspective to complex builds. Brandt oversees every phase – from initial planning through occupancy – ensuring facilities meet the highest standards for quality, safety, and regulatory compliance.

TIM ANDREW
Senior VP of Operations

Tim oversees WDS medical and bioscience projects nationwide, ensuring each facility is delivered on time, on budget and to exacting standards. He coordinates resources, manages complex technical requirements and facilitates communication among all stakeholders – allowing providers and researchers to focus on patient care and scientific advancement while WDS executes projects efficiently and reliably.

TREVOR VIREN
Project Manager

Trevor brings expertise in coordinating complex projects from planning through completion. He manages schedules, resources and subcontractor teams while ensuring compliance with regulatory requirements and technical specifications. Trevor's focus on efficient execution, quality control and clear communication helps clients deliver high-performing medical and bioscience facilities on time and on budget.

DANA DUFT
Senior Superintendent

As Senior Superintendent, Dana brings more than 35 years of experience to the team. He has overseen medical facilities as well as commercial, retail and industrial projects. Dana manages day-to-day site operations, ensuring quality control, coordinating subcontractors and maintaining strict adherence to safety protocols and project specifications. His expertise keeps complex, technically demanding projects on schedule and built to the highest standards.
